

Position – J25-18 Marine Structural Engineer**Position Type** - Full-time, Salary**Salary Range** – \$90,000 to \$140,000 CAD**Availability** – Immediate**Location** – Burnaby, Victoria**About Westmar Advisors**

Westmar Advisors Inc. (Westmar) is a dynamic and growing advisory and engineering consultancy based in British Columbia. We specialize in industrial and public infrastructure projects across Canada and internationally, offering a blend of strategic advisory and technical engineering services. Our team is committed to innovation, professional integrity, and fostering a collaborative, inclusive culture.

Job Overview

We are looking for an engaged and enthusiastic intermediate level Marine Structural Engineer to join our team. The candidate will be a Professional Engineer with technical proficiency in structural engineering and experience in the development of maritime and transportation infrastructure. The ability to manage small projects and engage clients, other professionals, and government agencies is important. This position is available at our Burnaby or Victoria locations.

Technical Responsibilities

- Execute detailed design of maritime and/or transportation structures.
- Generate project deliverables including design criteria, drawings, specifications, and reports.
- Prepare quantity take-offs and assist in the preparation of capital cost estimates.
- Provide field services to support projects during construction.
- On occasion, assist with structural inspections and prepare inspection reports.

Project Management Responsibilities

- Work with managers to determine client requirements, prepare proposals, develop cost estimates, and assist with project scheduling.
- Engage with clients, subconsultants, contractors, and agencies through a variety of communications.
- Contribute to a diverse and positive workplace through positive, value-driven interactions with other team members.

Requirements

- 5 to 10 years of experience in the engineering of maritime and/or transportation infrastructure.
- Registered or eligible for registration with Engineers and Geoscientists British Columbia as a Professional Engineer.

Assets

- Post-graduate degree in civil and/or structural engineering.
- Strong interpersonal skills and experience working with existing and potential clients.
- Strong communications skills, including proficiency in technical writing.
- Experience working on projects in the Pacific Northwest.
- Being comfortable working outdoors in operating industrial facilities and/or construction environments is an asset.

Why Join Westmar?

A values-driven culture that puts people first—both clients and colleagues.

- Play a key role in shaping projects and client strategies that have a lasting impact.
- Opportunities to advance in project management, technical leadership, business development, and advisory consulting.
- Be part of a team that values innovation, professional integrity, and inclusivity.
- Engage with a wide variety of industries, infrastructure types, project phases from concept development through implementation and optimization, and client challenges.

We look forward to hearing from you, please send resume with covering letter to careers@westmaradvisors.com.
